Snostop Plus

SNOSTOP[®] PLUS

PATENT PENDING

www.snostop.com

Replaceable snow guard face functions as 'excess snow load breaker' to prevent snow load damage to roof's substructure.

Base anchor assembly functions as snow brake.

PLUS offers integrated heat trace cable option.

Comprised of two fully detachable polycarbonate components.

Sno Stop Plus

- Made with high density polycarbonate
- Holds snow and ice in place, allowing it to melt slowly
- Holds heating cables, where required
- Conveniently installed on any roof type
- Engineer designed and tested
- Protects eaves troughs and property from damage
- Easily installed by the average homeowner

Box Contains 12 SnoStop Plus which covers two doorways or one garage
Fasteners not included.
